Gender: Male **Date of birth:** 22/09/1999 **Place of birth:** Jeddah, Saudi Arabia **Nationality:** Jordanian

ABOUT ME

Computer Science M.Sc. candidate specializing in Natural Language Processing and applied machine learning. Hands-on experience fine-tuning transformer models, building LLM-powered data pipelines, and running large-scale experiments on HPC clusters. Currently developing an unsupervised topic-modeling pipeline for multilingual text corpora, with a consistent track record of turning research prototypes into benchmarked, reproducible systems.

WORK EXPERIENCE

German Aerospace Center (DLR)

City: Jena | **Country:** Germany

[04/2026 – Current] **Master's Thesis (Research)**

- Developing an unsupervised NLP pipeline for fine-grained topic classification of a large multilingual web corpus, as part of the OpenSearch@DLR 2.0 research initiative.
- Building topic-modeling pipelines with multilingual Sentence-BERT, BERTopic, LDA, and lbl2vec; evaluating outputs via silhouette scores and structured human assessment.
- Collaborating with an interdisciplinary research team spanning the German Aerospace Center (DLR) and the University of Bonn.

Fraunhofer ISE

City: Freiburg | **Country:** Germany

[17/11/2025 – Current] **Scientific research assistant**

- Contributed to the development of sophisticated data analysis tools in Python, focusing on the visual representation of multi-dimensional battery metrics.
- Collaborated on the integration of battery datasets into LLM-driven analysis pipelines, exploring the intersection of energy storage and Generative AI.
- Mentored team members on DevOps best practices, specifically focusing on Git workflows to ensure reproducible research and code integrity.

Bonn-Aachen International Center for Information Technology (b-it)

City: Bonn | **Country:** Germany

[01/04/2025 – 30/09/2025] **University research assistant**

- Adapted reinforcement learning pipelines on HPC clusters with reasoning traces and multi-head attention.
- Fine-tuned Transformer models (GPT-2, SciFive, BioBERT) for NER, QA, NLI, and relation extraction.
- Built and benchmarked QA & extraction pipelines, outperforming BERT/BioBERT baselines.
- Integrated Hugging Face Transformers for structured data extraction at scale.
- Conducted LLM evaluations for accuracy, latency, and robustness.
- Exposure to retrieval-augmented generation (RAG) design and benchmarking.

EDUCATION AND TRAINING	[04/2023 – Current] Master of Science in Computer Science <i>Rheinische Friedrich-Wilhelms-Universität Bonn</i> City: Bonn Country: Germany
	[09/2018 – 06/2022] Bachelor of Science in Computer Science <i>King Abdulaziz University</i> Country: Saudi Arabia Thesis: Recommendation System for Educational Material Quality Assessment
LANGUAGES	German (B2) English (C1) Arabic (Native)
SKILLS	Technical: Python Machine Learning LLM PyTorch Hugging Face NLTK NumPy Pandas Scikit-learn Matplotlib Seaborn SQL Java Linux HPC Clusters ROS2 Soft: Analytical thinking Teamwork Problem-solving Adaptability
PROJECTS	[04/2025 – 07/2025] Transformers Navigating Mazes with Multi-Step Prediction - Improved multi-step planning in transformer agents with MLM-U objective, enabling forward/backward predictions and outperforming standard transformers. - Engineered transformer in Python (PyTorch, Hydra) with switchable AR and MLM-U modes under PAST encoder-decoder architecture. - Built benchmarking scripts/datasets incl. A* traces, showing 4x higher sample efficiency and 2x faster convergence than next-token objectives. github.com/Sayantak/maze_navigation_MLMU [05/2025 – 09/2025] Scientific Information Extraction - Designed a modular NLP framework using PyTorch + Hugging Face for biomedical text classification, semantic search, and relation extraction. - Fine-tuned domain-specific transformers with the BioRED dataset. - Explored RAG pipelines for improved QA accuracy. github.com/Ziad-Aamer/NLP-Lab-Uni
HOBBIES AND INTERESTS	Jogging Board Games Creative Writing
